

ELABORATE DESIGN by W. J. Hanson.

Bill Hanson has sent the photocopy of this elaborate perfin design. It is on a Q.V. Jubilee 2½d S.G.201. The postmark is BEESTON-NOTTS and the perfin is H/&C^o/L^d. There are 133 holes and the whole design is 21mm high. It is illustrated, very faintly, in the Edwards Cat. as H1580.01 but is not in Tilles. Has anyone any more information about this one?
